AMAZINGLY FUEL EFFICIENT!

1. **SPONSONS**
Provide stability by limiting rock and roll of the boat, allowing movement around the cockpit or fishing on the platform.
2. **WIDE-BODY HULL**
Passengers enjoy extra legroom and storage because the hull is as wide in the bow as it is in the stern. This also improves fuel efficiency.
3. **LIFTING STRAKES**
These create lift to improve performance, fuel efficiency and water management, which delivers a smoother, drier ride.
4. **REVERSE CHINE HULL**
Gets you up on plane quickly so you always have full visibility, even when you're taking off from a full stop.
5. **SHALLOW DRAFT HULL**
Allows you to cruise shallow water other boats can't, and use less horsepower to get up on plane, creating one of the most fuel efficient boats on the water.

Built with safety in mind using foam flotation and self-bailing decks, Hurricane boats are NMMA Certified.
